SUMMARY

Software Engineer with experience in designing and developing modern web, desktop, and mobile applications using C#, Java, Python, ASP.NET MVC, PHP, JavaScript, React, Laravel, SQL Server, MySQL, and MongoDB. Skilled in building scalable, user-focused software with clean architecture, responsive interfaces, and secure backend systems. Experienced in integrating AI technologies, including Google Gemini API, to develop intelligent features such as chatbots, automation, and smart recommendations. Passionate about learning emerging technologies and delivering innovative, high-quality software solutions that solve real-world problems.

WORK EXPERIENCE

Freelance Software Engineer

2024 – Present

Self-Employed | Remote

- Design and develop custom web, desktop, and AI-powered applications for clients using modern software engineering practices.
 - Build full-stack solutions with PHP, ASP.NET MVC, C#, JavaScript, MySQL, SQL Server, and Bootstrap.
 - Integrate AI technologies such as Google Gemini API to develop intelligent chatbots, automation tools, and AI-assisted business solutions.
 - Develop secure REST APIs, authentication systems, payment gateway integrations (Stripe), and database-driven applications.
 - Gather client requirements, design scalable architectures, deploy applications, and provide ongoing maintenance and technical support.
-

PROJECT EXPERIENCE

EASCCA Hospice – AI-Powered Hospice Management System

- Developed a centralized hospice management system for patients, volunteers, donations, events, and reporting.
- Integrated Google Gemini AI to provide an intelligent assistant for content generation, administrative support, and operational workflows.
- Implemented secure authentication, role-based access control, Stripe payment processing, and analytics dashboards.
- Designed and optimized the MySQL database for efficient data management.

CeylonX – AI Travel Assistant Platform

- Built an AI-powered tourism platform that provides personalized travel recommendations across Sri Lanka.
- Integrated Google Gemini AI to power conversational travel assistance, itinerary planning, destination recommendations, and travel-related queries.
- Implemented subscription plans, payment processing, and user account management.
- Developed responsive interfaces and optimized backend performance.

UniManage – University Management System

- Developed a university management platform for students, lecturers, administrators, course management, and academic records.
- Built secure authentication, course enrollment, attendance tracking, notifications, and online payment features.
- Designed scalable database architecture and administrative dashboards.

Green Life Organic Store – POS & Inventory Management System

- Developed a Windows desktop application for inventory management, sales processing, customer management, and reporting.
- Implemented secure authentication, role-based permissions, stock monitoring, and sales analytics.
- Improved operational efficiency through automated inventory tracking.

TextVision – AI Image Text Recognition Application

- Developed an Android application that extracts text from images using on-device machine learning.
- Integrated Google ML Kit for optical character recognition (OCR).
- Implemented image capture, gallery import, real-time text recognition, and copy/share functionality.

TECHNICAL SKILLS

- **Programming Languages:** C#, Java, Python, PHP, JavaScript, TypeScript, HTML5, CSS3
- **Frontend Development:** React.js, Bootstrap, jQuery, AJAX, Responsive Web Design, UI/UX
- **Backend Development:** Laravel, Core PHP, Node.js, Express.js, ASP.NET MVC, Spring Boot, REST APIs
- **Mobile Development:** Android Studio, Java Android, Flutter, Firebase, ML Kit
- **Desktop Development:** C# WinForms (.NET), Java Desktop Applications
- **AI & Machine Learning:** Google Gemini API, AI Chatbots, AI Automation, Prompt Engineering, ML Integration
- **Database:** MySQL, Microsoft SQL Server, MongoDB, Firebase, SQLite
- **Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, Android Studio, Cursor AI, Postman, Draw.io, Composer, Claude AI
- **Other Skills:** OOP, MVC Architecture, SDLC, API Integration, Stripe Payment Gateway, SMTP, Software Testing

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Software Design & Technical Decision Making
- Communication & Team Collaboration
- Time Management & Project Planning
- Adaptability & Continuous Learning
- Attention to Detail
- Creativity & Innovation
- Self-Motivation & Independent Working

EDUCATION

BEng (Hons) Software Engineering	2025 – 2026
• London Metropolitan University	
Diploma in Information Communication Technology	2023 – 2024
• Vocational Training Authority of Sri Lanka	

LANGUAGES

- English (Fluent)
- Tamil (Native)
